Feature Updates

July 03, 2024

Teachers can preview Student's attachments before downloading

Teachers can now preview attachments submitted by students before downloading them. The supported formats for preview are PDF and image files (JPEG, PNG). This update simplifies the process, allowing teachers to view the content more easily and provide feedback to students on their assignments. Additionally, students can preview the attachments they have submitted.

“Mark all as read” Feature

The latest update introduces a "Mark all as read" feature for notifications. Users can now select this option to mark all unread notifications as read with a single click.
