Feature Updates

August 2024

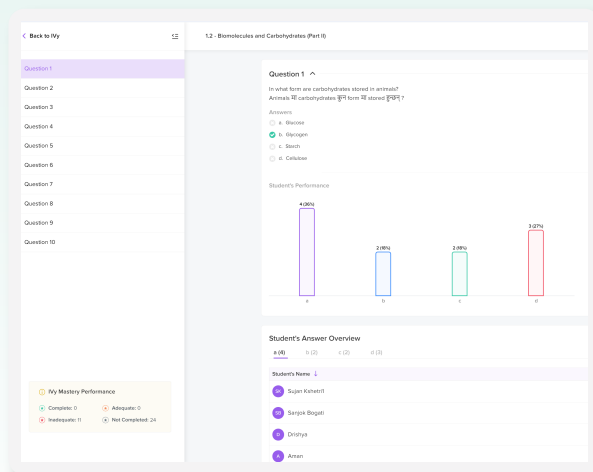

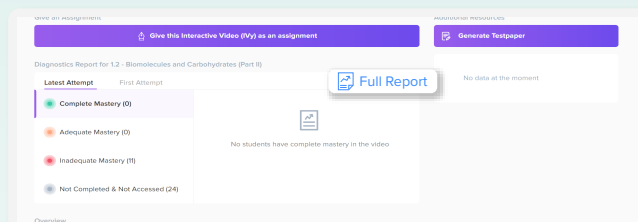

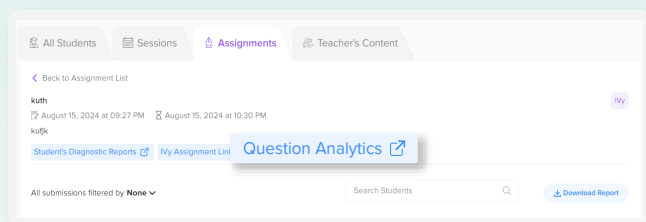

Latest and first attempted diagnostic report of students

Following the latest update, teachers can now view both the first and latest attempted diagnostic reports of students. This feature helps teachers track student progress and observe how they have improved over time.

Question Summary Report: Student's Answer Analysis and Insights

Teachers can now access detailed question-level analytics for interactive video assignments, including correct answers and student response data. This empowers teachers to identify common misconceptions and provide targeted support. This summary report is accessible through the IVY assignment link or directly from the interactive video.

Teachers can now view correct answers of self-grading testpaper after assignment submission.

Following the latest update, the "View Answers" submission design has been improved. Teachers can now view students' answers after the test paper has been submitted, specifically for self-grading and competency test papers. This update benefits teachers by allowing them to review and analyze student responses, gain a better understanding of student performance, and identify areas that may require additional attention.

3. In which of the following scenarios does enzyme hydrolase break bonds? [1]

a. In the presence of minerals
